THE TIME-COURSE OF SYNTACTIC AND SEMANTIC INTERFERENCE IN ONLINE SENTENCE COMPREHENSION

Daniela Mertzen¹, Brian W. Dillon², Dario Paape¹, Ralf Engbert¹
and Shravan Vasishth¹

¹University of Potsdam, ²University of Massachusetts Amherst

When do **syntactic** and **semantic** information come into play during long-distance dependency formation?

Cue-based theories address this question by studying similarity-based interference effects (McElree, 2000; Lewis & Vasishth, 2005; Van Dyke & Lewis, 2003; Van Dyke, 2007)

Cue-based retrieval

The **attorney** who forgot about the visitor **complained**.

target

retrieval point

Cue-based retrieval

The **attorney** who forgot about the visitor **complained**.

[+subj, +anim]

target

{subject, animate}  retrieval cues

retrieval point

Similarity-based interference

The attorney who forgot about **the visitor complained.**

[+subj, +anim]

target

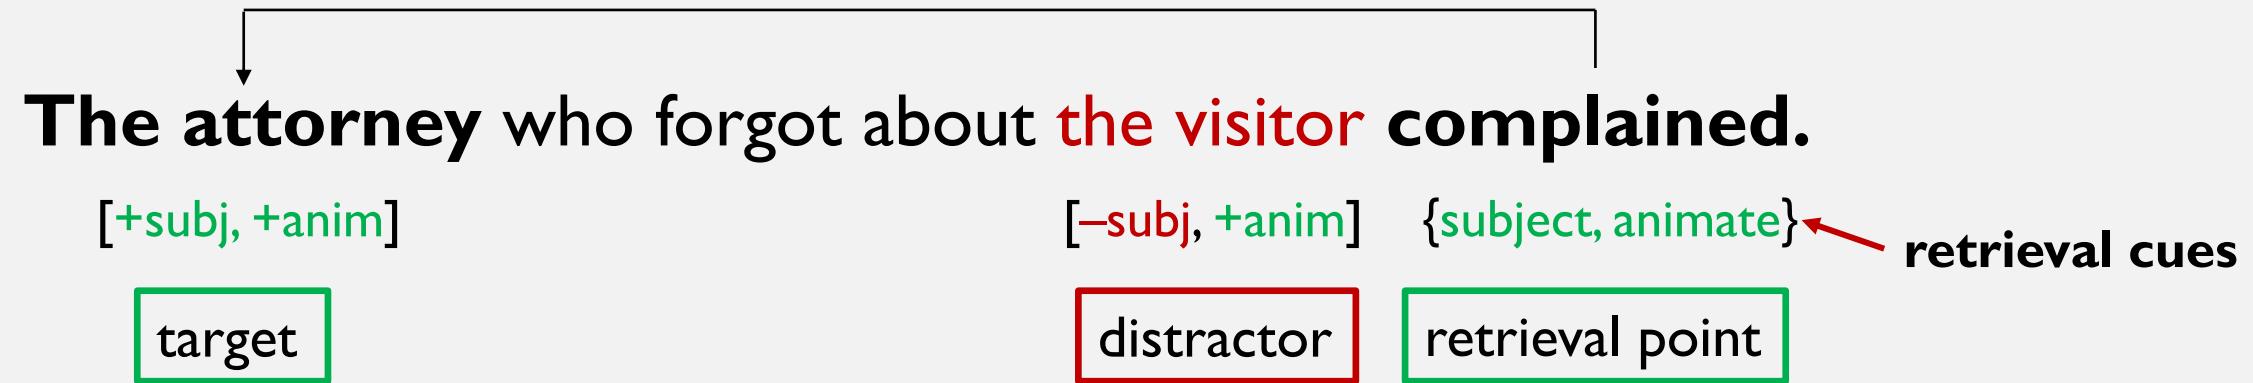

[−subj, +anim]

distractor

{subject, animate}

retrieval point

Similarity-based interference

- Syntactic and semantic interference occur simultaneously during retrieval

Empirical findings: unclear time-course

Van Dyke, 2007

- Syntactic interference at retrieval point
- Semantic interference sentence-finally

Van Dyke & McElree, 2011

- ET1: Semantic interference at retrieval point
- ET2: No evidence of semantic interference

Experiments

Eye-tracking (reading)

- English (N = 61)
- German (N = 121)

2 x 2 Design

Syntactic interference

- distractor –subject or +subject

Semantic interference

- distractor –animate or +animate

Materials

It turned out that **the attorney** [+subject, +animate] whose secretary

- a. had forgotten about the important **meeting** [−subj, −anim]
- b. had forgotten about the important **visitor** [−subj, +anim]
- c. had forgotten that the **meeting** [+subj, −anim] was important
- d. had forgotten that the **visitor** [+subj, +anim] was important

frequently **complained** {subject, animate} about the salary at the firm.

Predictions

at critical verb (complained)

... the attorney [+subject, +animate]...

- a. ... meeting [−subj, −anim]
 - b. ... visitor [−subj, +anim]
 - c. ... meeting [+subj, −anim]
 - d. ... visitor [+subj, +anim]
- } +subj slower

... complained {subject, animate}

Predictions

at critical verb (complained)

... the attorney [+subject, +animate]...

- a. ... meeting [**-subj**, **-anim**]] -subj
- b. ... visitor [**-subj**, **+anim**]]
- c. ... meeting [+subj, **-anim**]] +subj
- d. ... visitor [+subj, **+anim**]]

slower

... complained {subject, animate}

Predictions

at critical verb (complained)

... the attorney [+subject, +animate]...

- a. ... meeting [**-subj**, **-anim**] }
- b. ... visitor [**-subj**, **+anim**] }
- c. ... meeting [+subj, **-anim**] }
- d. ... visitor [+subj, **+anim**] }

-subj

+subj

slower

Syntactic interference

... complained {subject, animate}

Predictions

at critical verb (complained)

... the attorney [+subject, +animate]...

- a. ... meeting [−subj, −anim]
 - b. ... visitor [−subj, +anim]
 - c. ... meeting [+subj, −anim]
 - d. ... visitor [+subj, +anim]
- } +anim slower

... complained {subject, animate}

Predictions

at critical verb (complained)

... the attorney [+subject, +animate]...

- a. ... meeting [−subj, −anim]
 - b. ... visitor [−subj, +anim]
 - c. ... meeting [+subj, −anim]
 - d. ... visitor [+subj, +anim]
- } +anim }
- } −anim **slower**

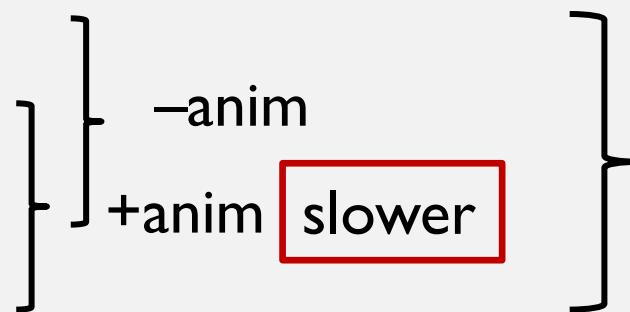

... complained {subject, animate}

Predictions

at critical verb (complained)

... the attorney [+subject, +animate]...

- a. ... meeting [−subj, −anim]
- b. ... visitor [−subj, +anim]
- c. ... meeting [+subj, −anim]
- d. ... visitor [+subj, +anim]

Semantic interference

... complained {subject, animate}

German materials

Es stellte sich heraus, dass **der Journalist** [+subject, +animate], dessen Kollege
It turned out *that the journalist, whose colleague...*

- a. von dem grauenhaften
of the gruesome Skandal [−subj, −anim] *scandal* berichtet hatte,
reported had,
 - b. von dem grauenhaften
of the gruesome Mafiaboss [−subj, +anim] *mafiaboss* berichtet hatte,
reported had
 - c. berichtet hatte, dass der Skandal [+subj, −anim] grauenhaft war,
reported had, that the *scandal* *gruesome was,*
 - d. berichtet hatte, dass der Mafiaboss [+subj, +anim] grauenhaft war,
reported had, that the *mafiaboss* *gruesome was,*

German materials

Es stellte sich heraus, dass **der Journalist** [+subject, +animate] dessen Kollege
It turned out that **the journalist**, whose colleague...

- a. von dem grauenhaften
of the gruesome Skandal [−subj, −anim] berichtet hatte,
reported had,

b. von dem grauenhaften
of the gruesome Mafiaboss [−subj, +anim] berichtet hatte,
reported had

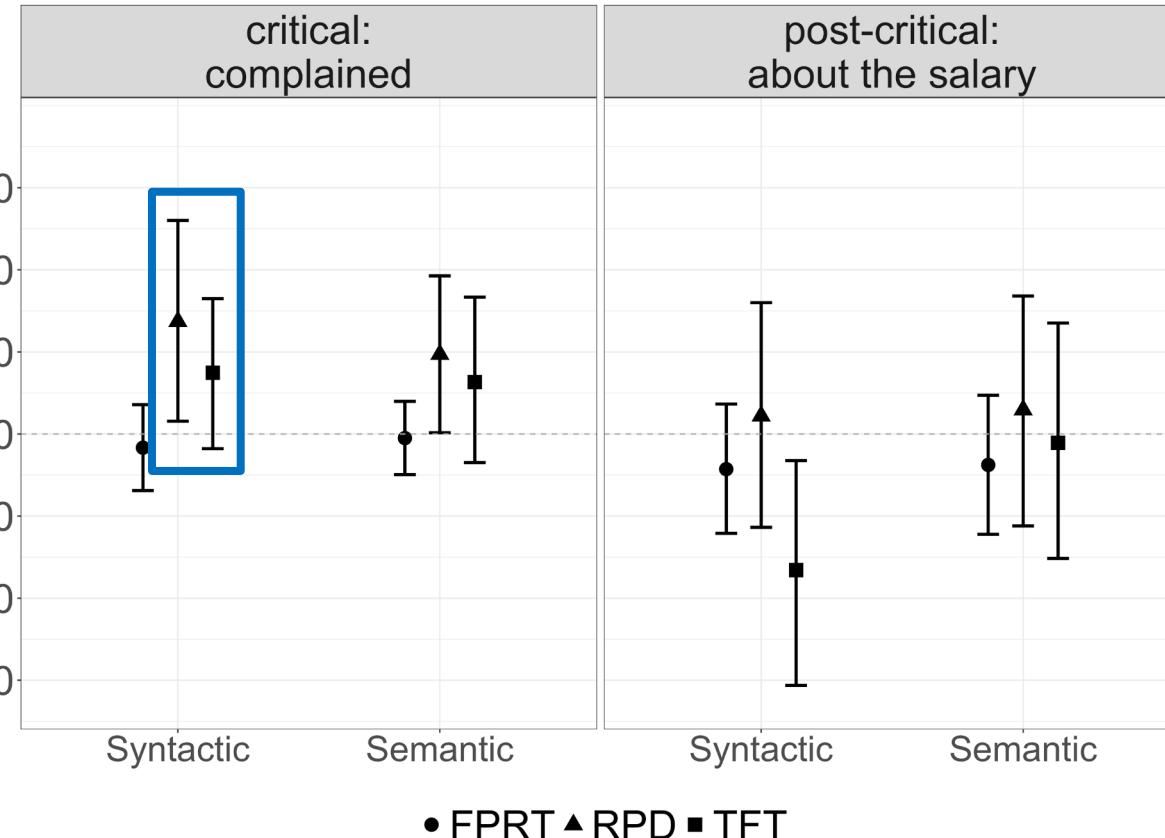

c. berichtet hatte, dass der Skandal [+subj, −anim] grauenhaft war,
reported had, that the scandal gruesome was,

d. berichtet hatte, dass der Mafiaboss [+subj, +anim] grauenhaft war,
reported had, that the mafiaboss gruesome was,

~~Same predictions~~

critical: log,

post-critical: um Informationen

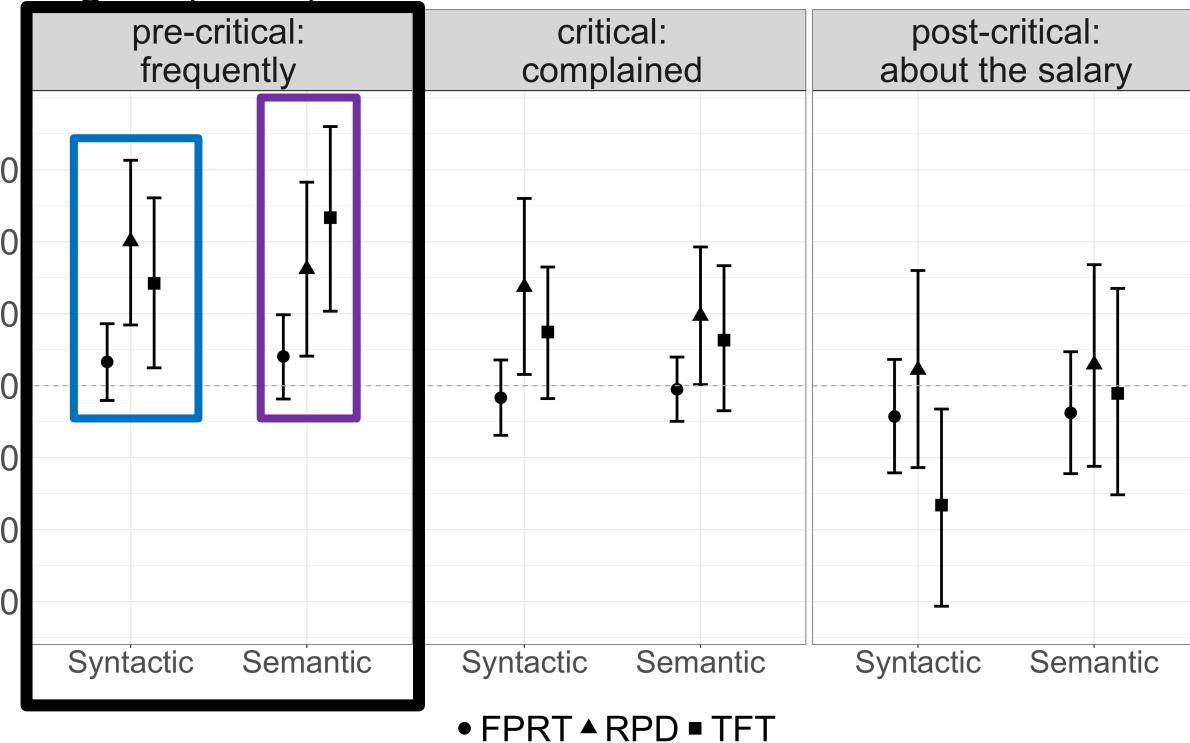

• FPRT ▲ RPD ■ TFT

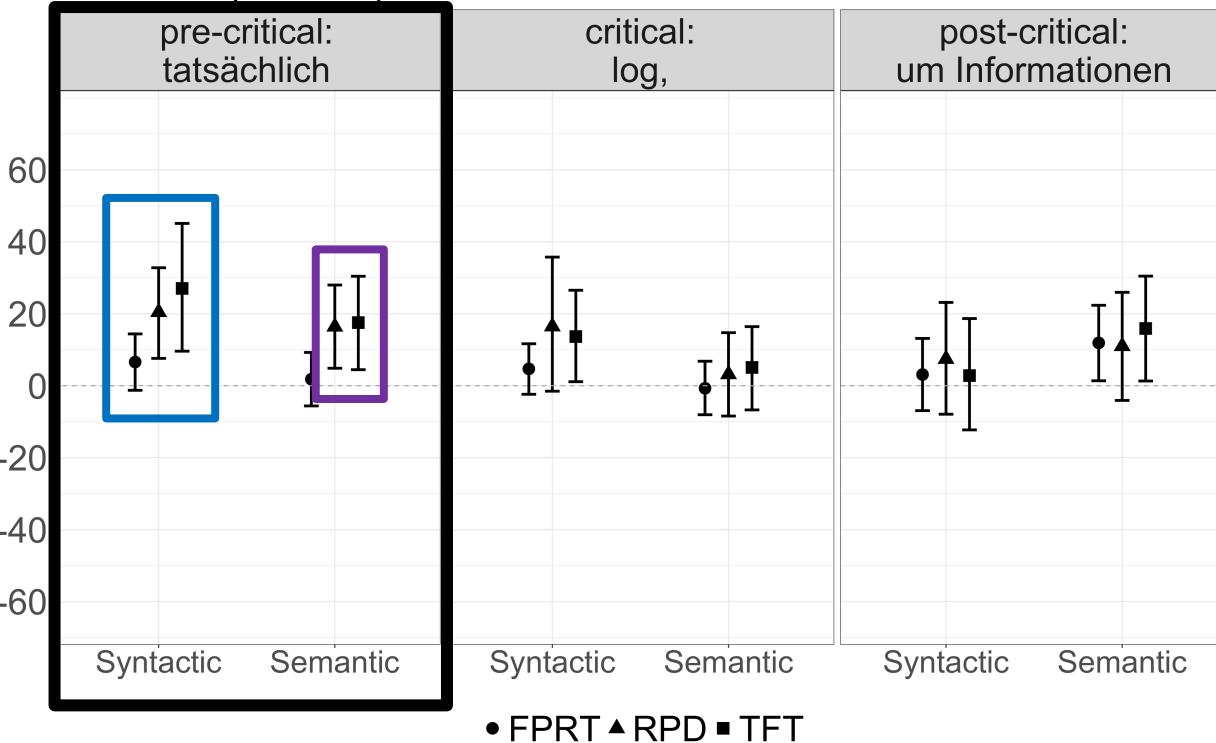

A twist in the story

English (N=61)

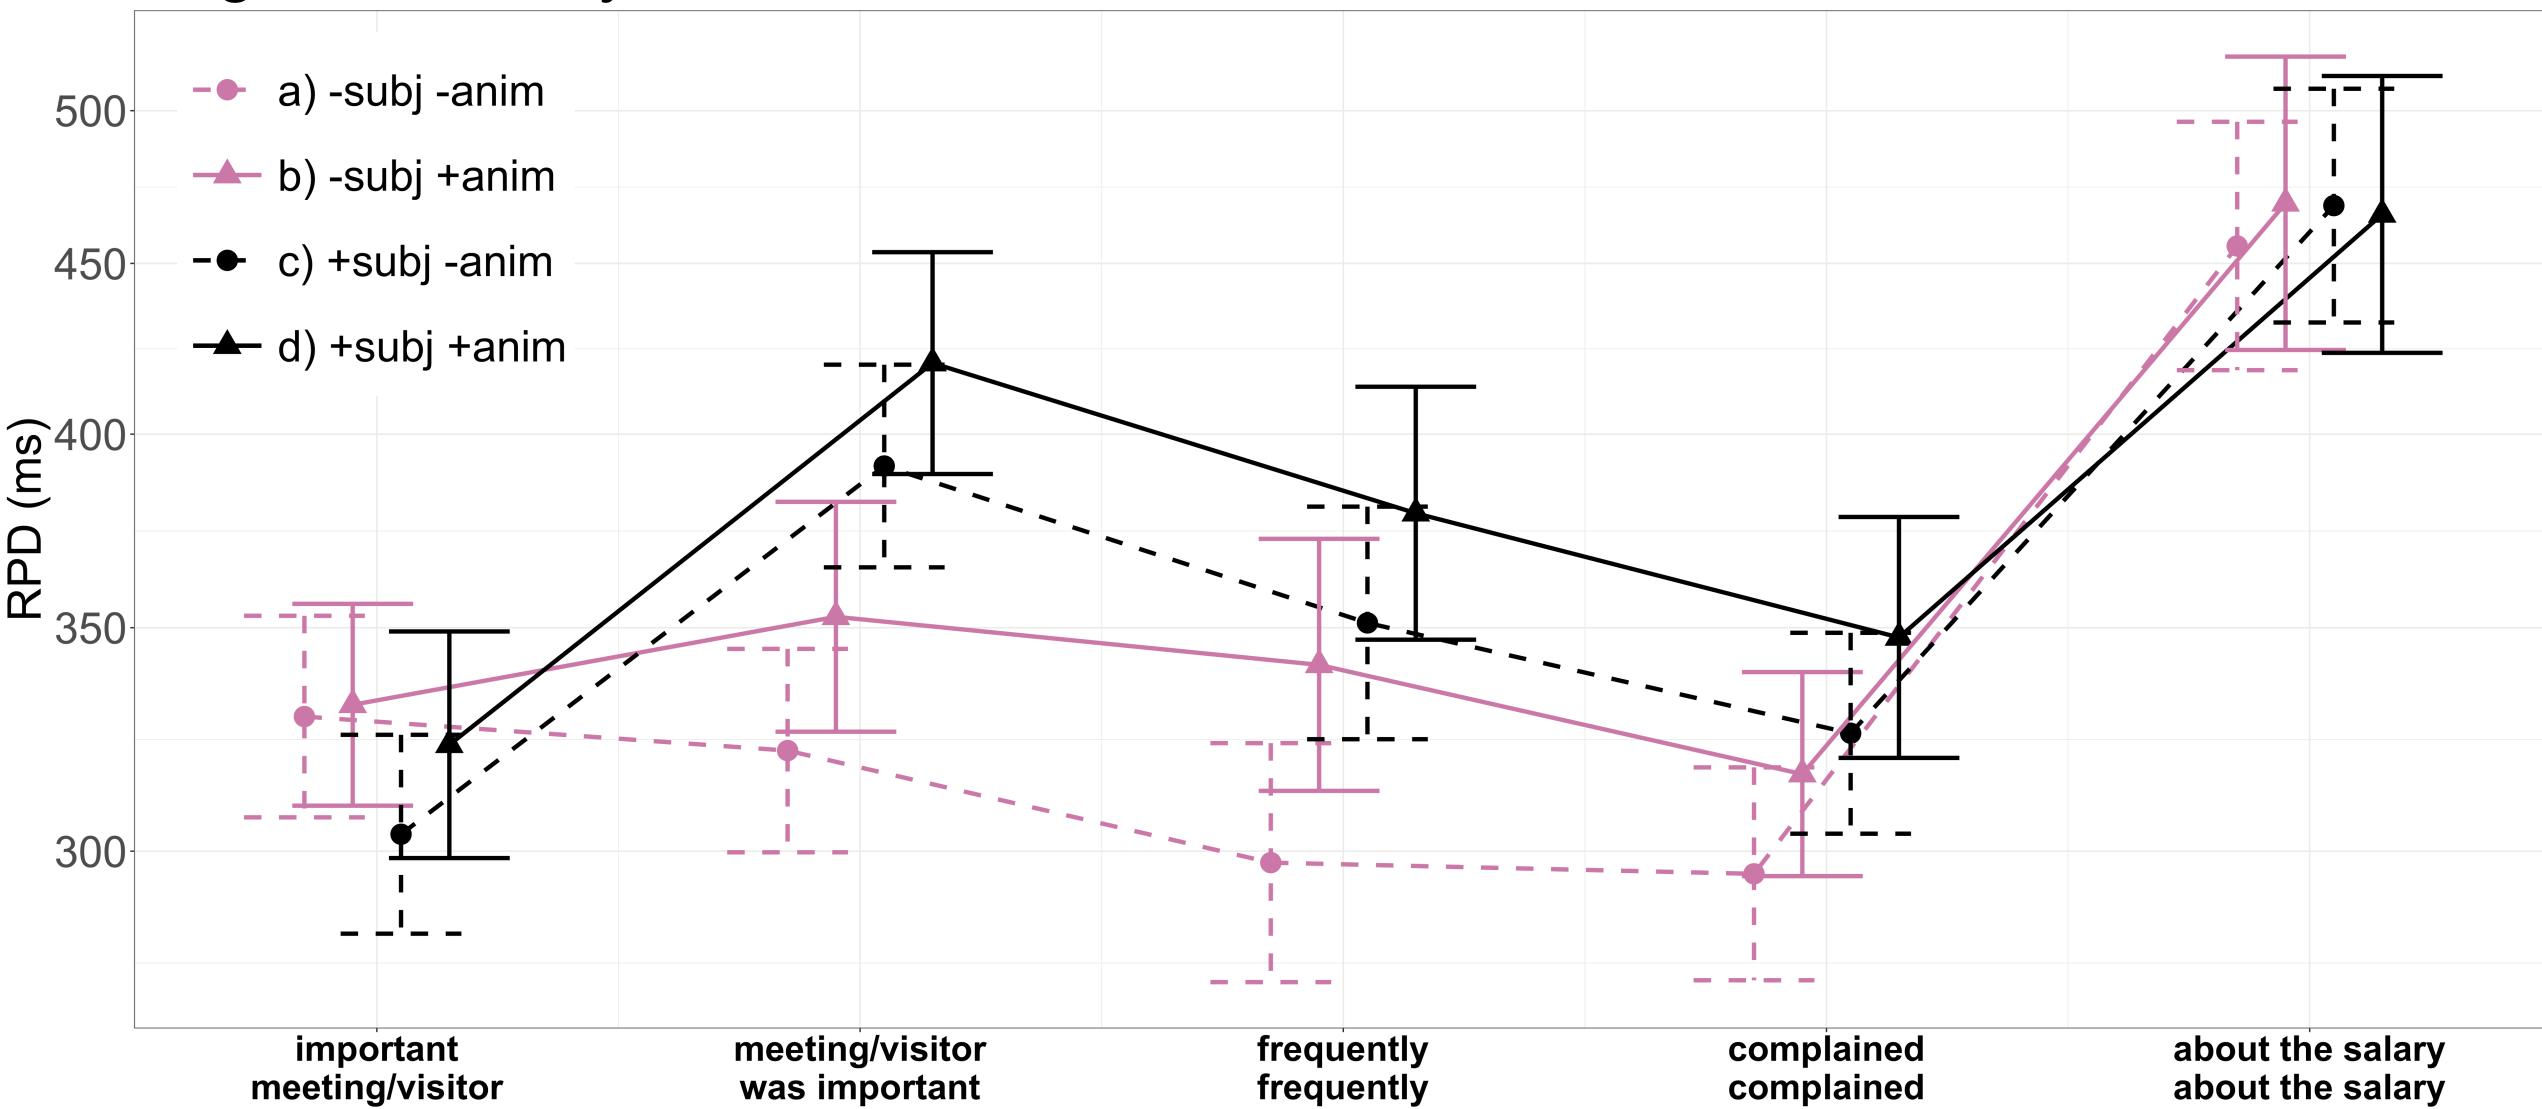

German (N=121)

- Interference? (predictive processing?)
- Parafoveal processing?
- Spillover?

English: RPD by-condition means and 95% CIs

Conclusions

Syntactic and semantic interference can arise simultaneously

- Cue-based retrieval interference?
 - Encoding interference?
- Both types of information can be used in parallel

Conclusions

Syntactic and semantic interference can arise simultaneously

- Cue-based retrieval interference?
 - Encoding interference?
- Both types of information can be used in parallel

Challenge:

Do our designs test what they are supposed to test?

How do we deal with pre-critical effects?

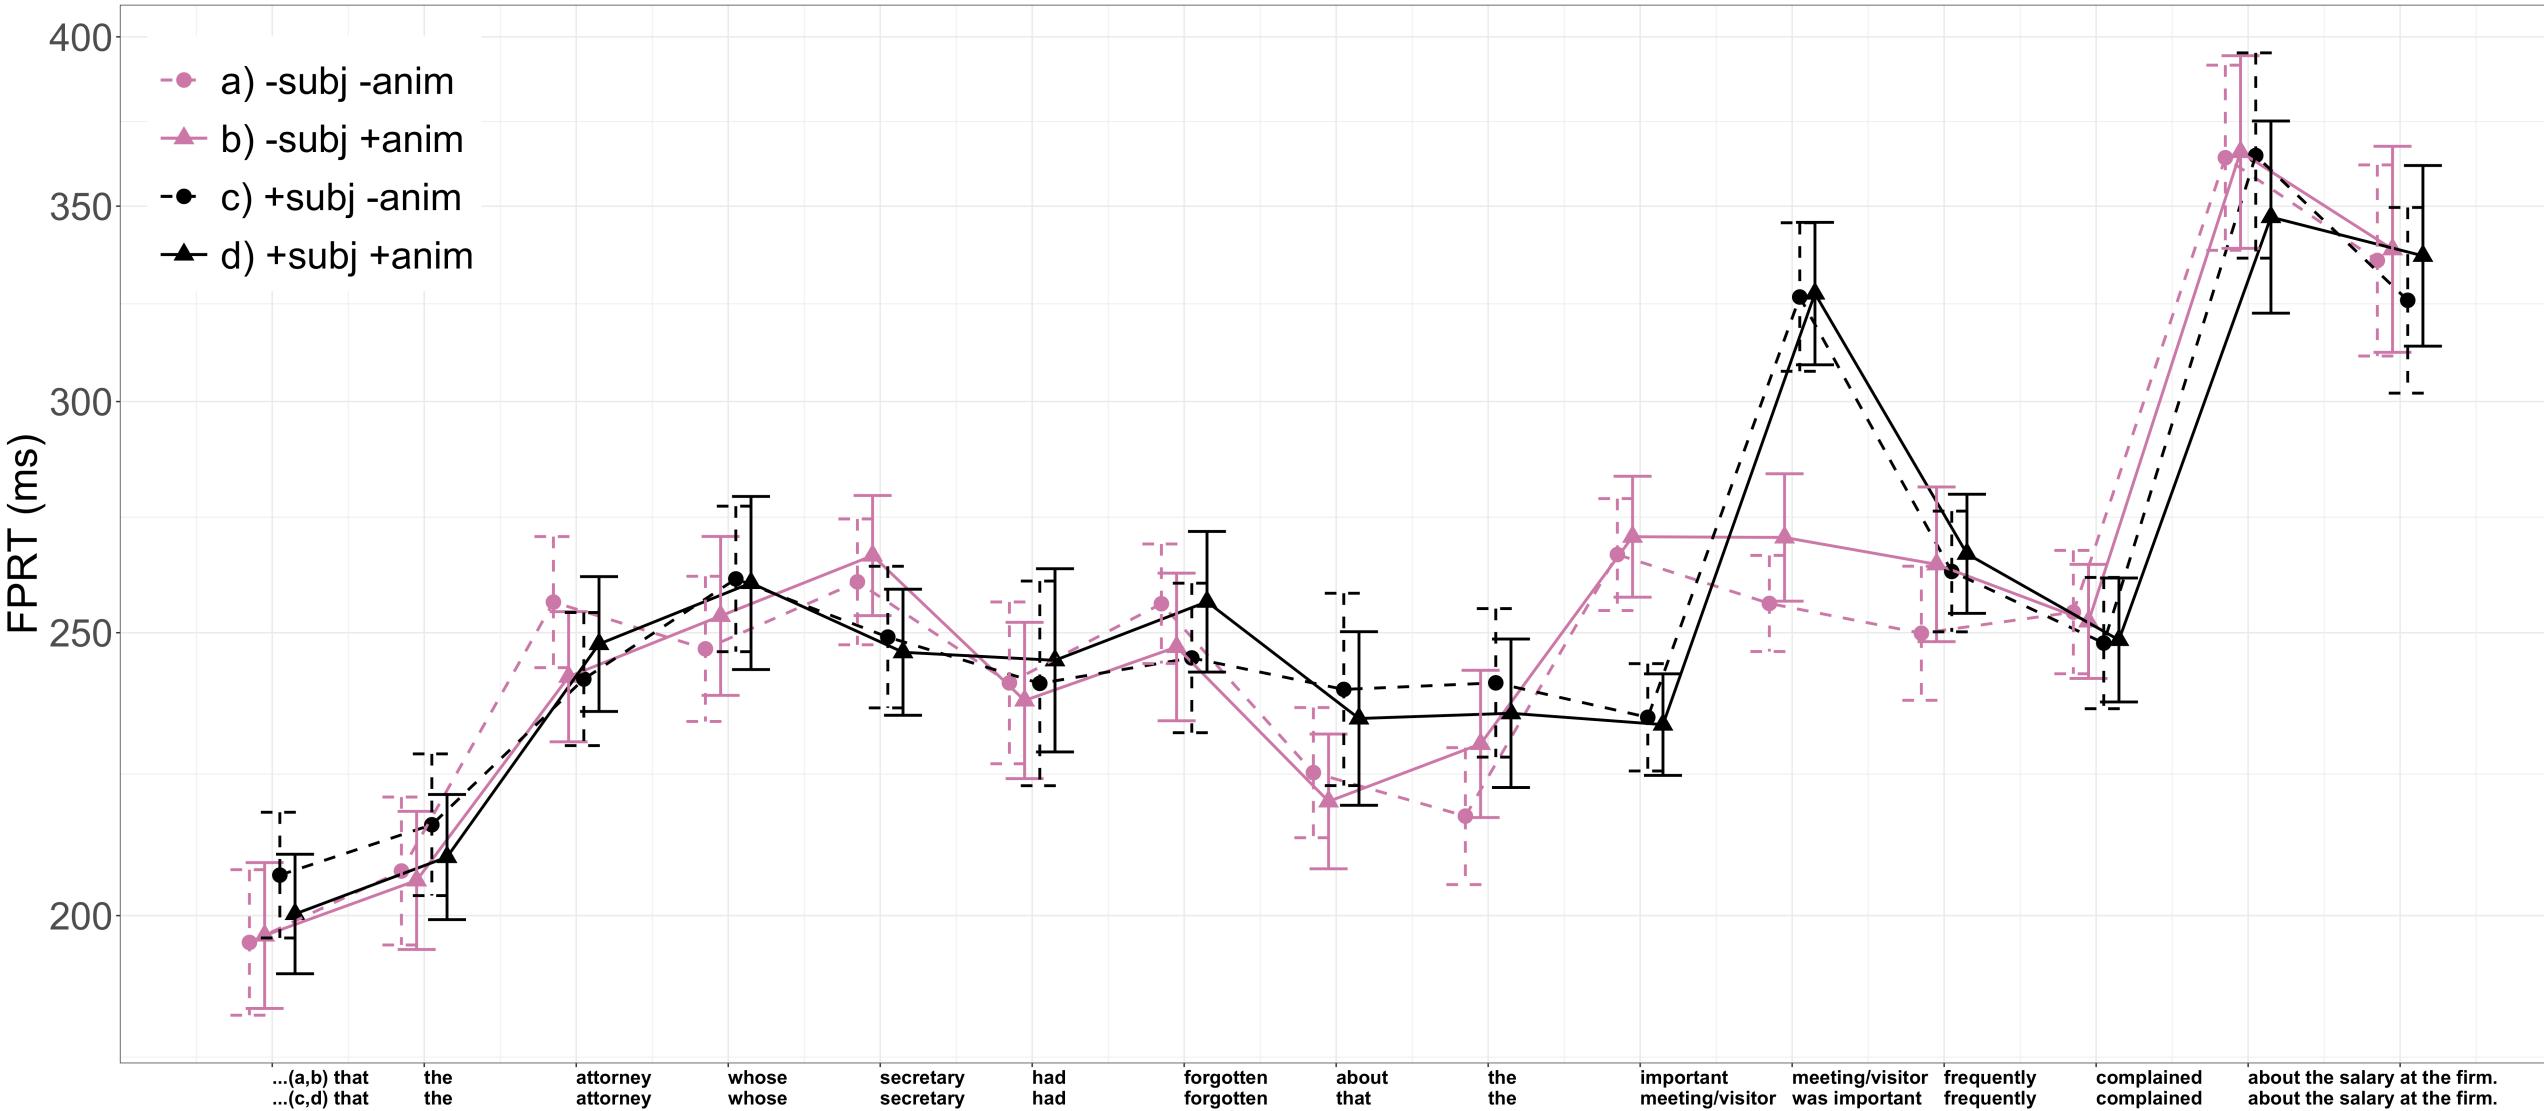

THANK YOU

Co-authors on this project:

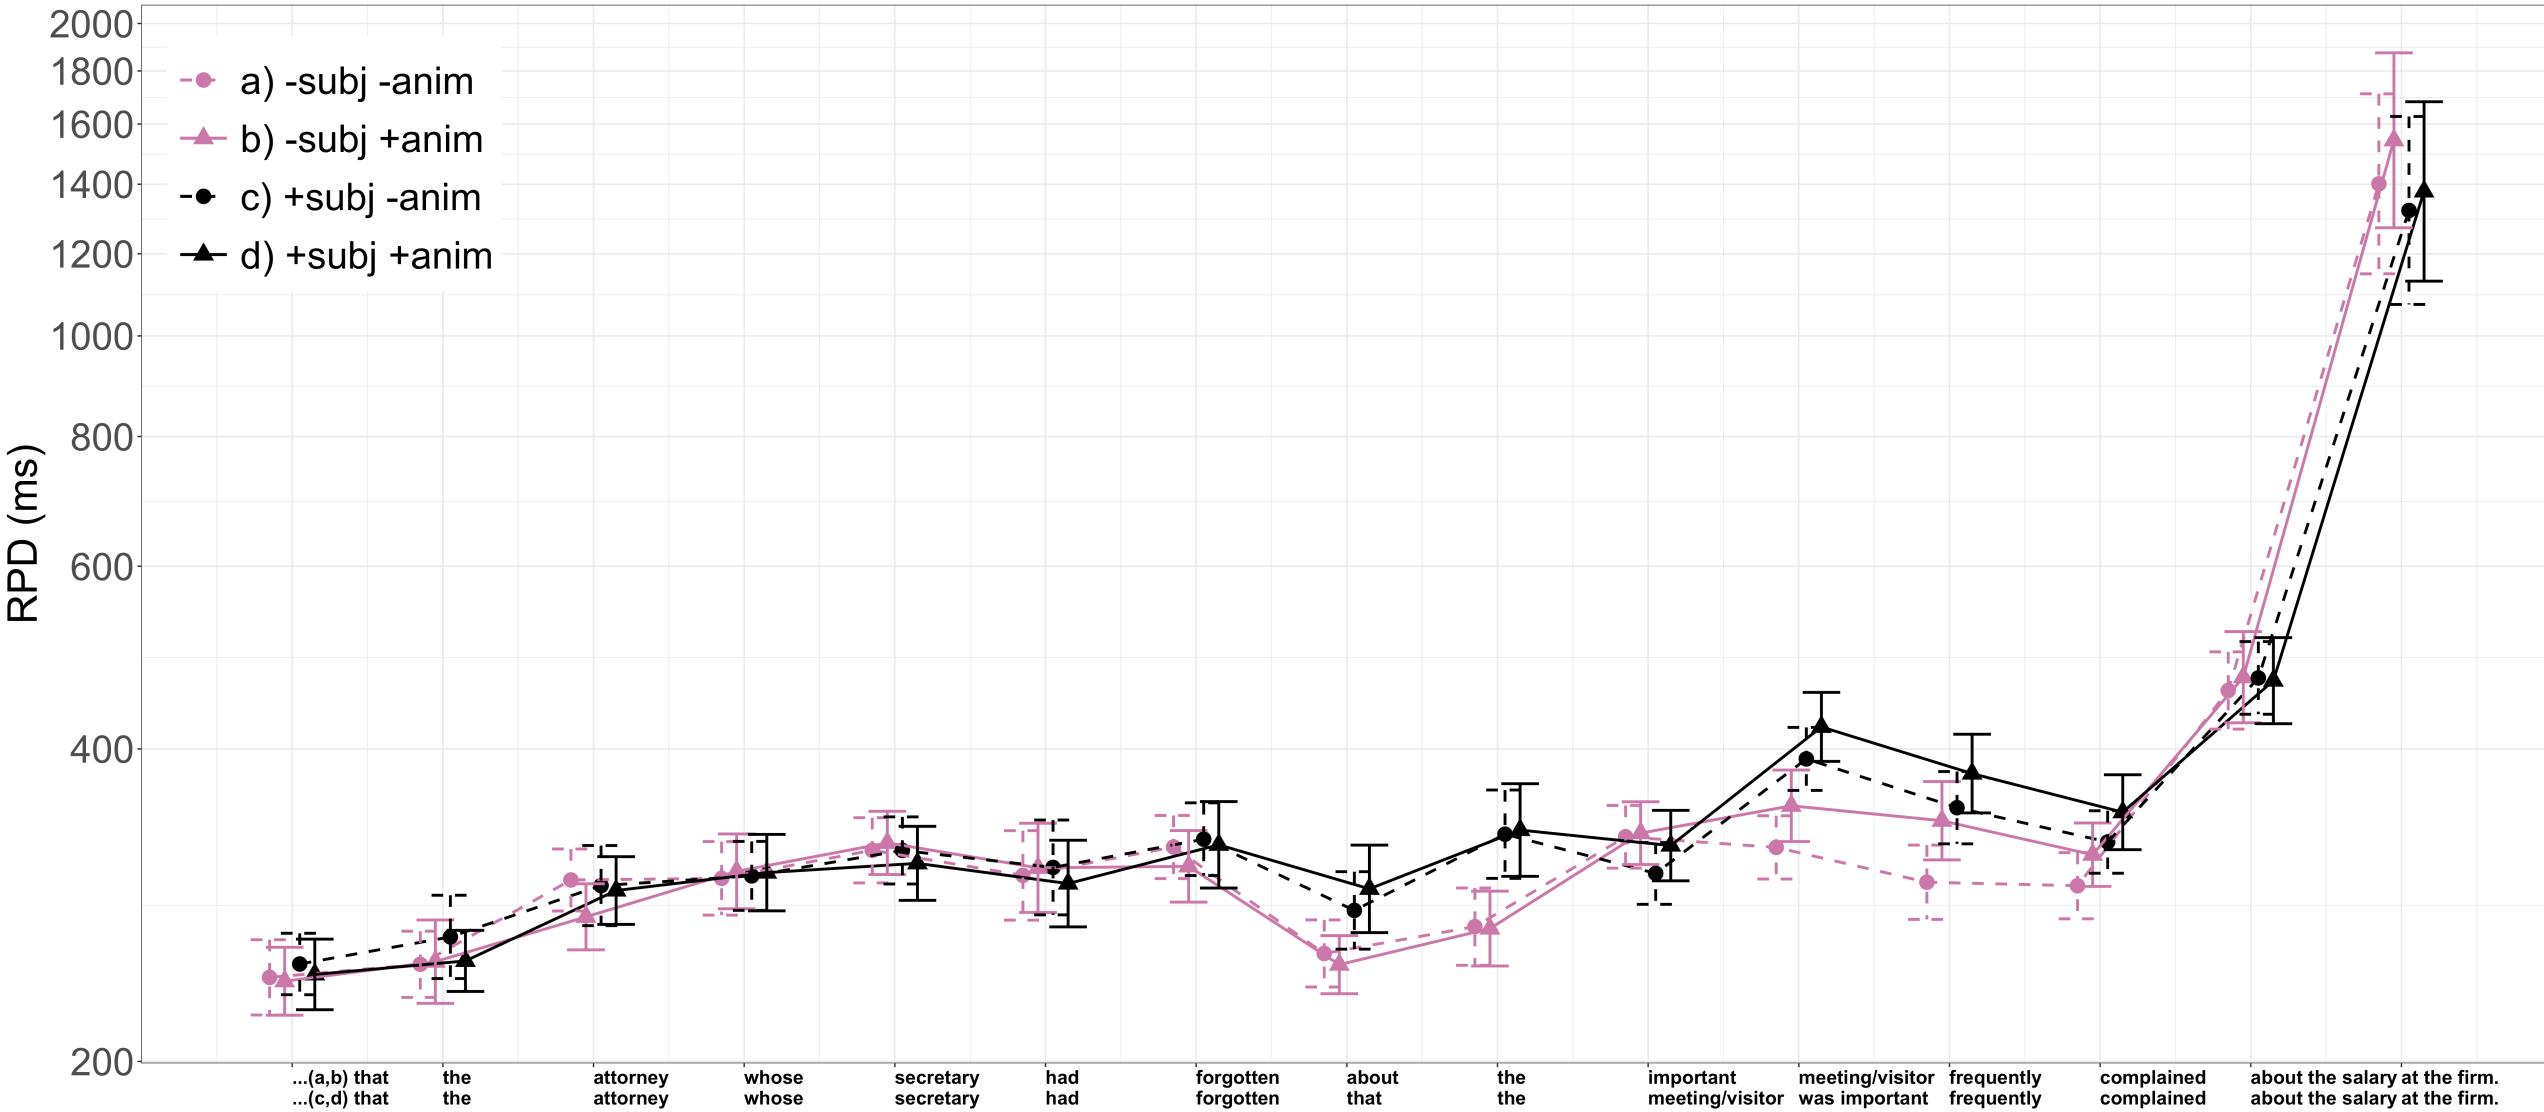

Appendix
